

TOP 5 COMPUTER TIPS

To get the most out of your Fish Smarter program.

Welcome to the world of modern fishing education and training!

To get the most out of Fish Smarter, we recommend you implement the 5 simple computer practices outlined in this booklet.

1

Use the right browser

We strongly recommend using Firefox or Chrome as your default browser. Safari is fine as a third option. Please do not use Internet Explorer, it is old and clunky. Whatever you use, be sure to have the most up to date version of your browser. If you do not know how, ask your kids.

2

Use Adobe reader for PDF's

Adobe reader is free and allows you to type directly into our PDF file documents and save your work.

Most computers are set up to open downloadable PDF's in Adobe Preview.

Simply close that version and reopen the files in Adobe Reader.

3

Do not share your password.

In order to maintain the security of our content, we have security systems in place to monitor log-ins.

Your account will be linked to you and you alone.

While we understand that you may wish to access the information via several personal devices (smart phone, iPad, computer), any evidence of password sharing will result in your account being disabled.

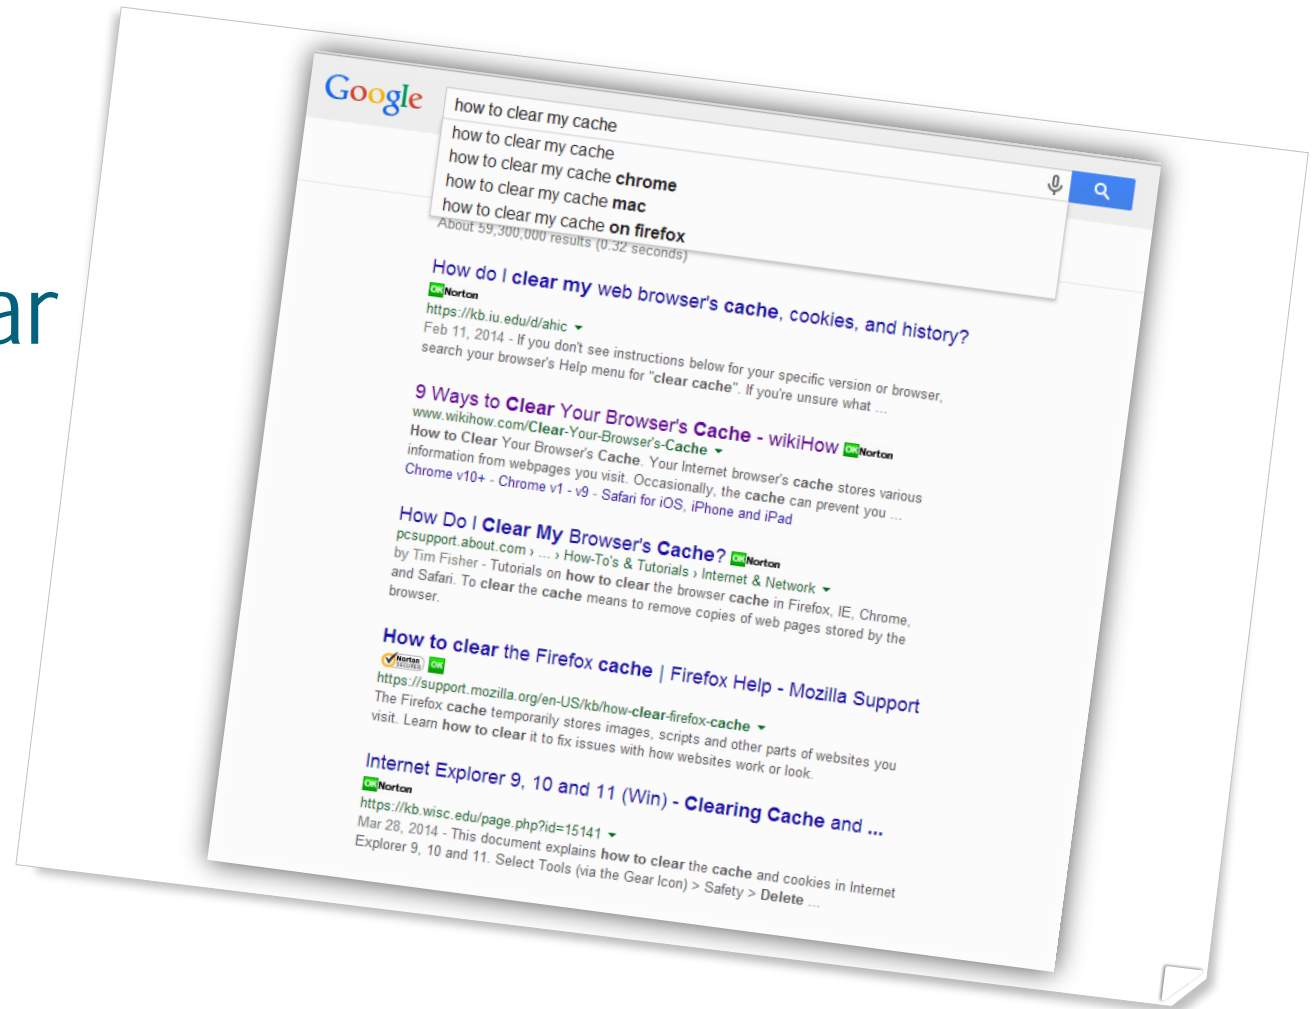

4

Having a tech difficulty? Clear your cache!

Many technical difficulties can be easily fixed by clearing your browser cache.

Log out of the system first, close any browser windows, then clear your cache.

Still not sure? Ask Mr Google how.

5

Still need help?

If you need further support, our customer happiness team will get back to you as quickly as possible.

Please note our business hours are Monday to Friday 9am – 4pm.

You can email us at;
